Camellias and Azaleas

MILLARD HENNY

159-B

BROOKS, OREGON

FALL 1948

SPRING 1949

WE invite your personal inspection of our nursery any time you are traveling Pacific Highway 99. Watch for our sign 10 miles north of Salem, 40 miles south of Portland.

Not only will you be able to see the newest in camellias blossoming in our display greenhouse and outdoors, but will be able to select personally from a large stock of true to name, disease free, quality grown plants. Our selection of varieties will please the most discriminating.

TELEPHONE: GERVAIS 2344

General Information

All items in this catalogue will be shipped post paid and crated free. Shipment will be made by most practical means, in wooden crates. Cash with those orders to be shipped immediately, and 20% of purchase amount will be required to reserve plants for later delivery. Rooted cuttings will be shipped in June and July.

Sizes and prices of any specific varieties in larger stock than listed will gladly be quoted upon request.

May we remind you to plant camellias and azaleas only as deep as grown in the nursery. Addition of moisture-saving peat moss, deep watering during summer months, fertilizer after blossoming season, hand cultivation only, are suggestions to those unfamiliar with the growing of these plants.

Plant rooted cuttings in a shady spot using a good peat mixture and water freely during summer. By fall they can be moved to your desirable location.

The majority of the following camellias are field grown, with the exception of a few varieties grown in cans or pots. In the event we are out of the exact size of your order, we will send nearest size, but will not substitute variety unless suggested by customer.

New Introduction

Several years ago the late Mr. J. C. Williams of Great Britain crossed the Species *Camellia Saluenensis* with a single *Camellia Japonica* in his famous garden at Caerhays.

Several of the seedlings of this cross have been appraised as very delightful garden subjects, and probably the most noteworthy of the entire group is *Camellia J. C. Williams*.

The bloom of this outstanding camellia, while not as large as many of the camellia blooms with which we are familiar, has several desirable qualities. The flower is of unusual bright pink color, semi-double with yellow stamens. Even small plants are very floriferous, and the buds have been known to remain undamaged in zero temperatures. Not only has this hardiness been noted in relation to cold but in the fact that this camellia has been able to withstand the bright sunlight more than any other variety in Great Britain. The several plants blooming at the nursery this spring were testimonies of these reports.

Recently *Camellia J. C. Williams* received a First Class Certificate from the Royal Horticultural Society of Great Britain, the first *Camellia* in ten years to obtain this award.

Rooted cuttings available in June \$7.50
